

Straep — Sitemap and Information Architecture

Version: 1.0

Document owner: Product / UX Team

Dependency: Informs all route definitions in the frontend (Next.js) and backend (Django).

Table of Contents

- 1. [Site Structure Overview](#)
 - 2. [Public Marketing Website](#)
 - 3. [Authentication Routes](#)
 - 4. [Logged-In App \(All Users\)](#)

 - 7. [Admin Dashboard](#)
 - 8. [Navigation Structures](#)
 - 9. [Page Hierarchy Diagram](#)
 - 10. [Route Definitions Reference](#)
 - 11. [Redirect and Guard Rules](#)
-

1. Site Structure Overview

Straep has five distinct zones, each with its own purpose and navigation logic:

Zone	URL Prefix	Audience	Auth Required
Public marketing website	<code>/</code>	Anyone	No
Auth flows	<code>/auth/</code>	Anyone	No
Logged-in app	<code>/home</code> , <code>/discover</code> , etc.	All registered users	Yes
Business / creator dashboard	<code>/dashboard/</code>	Business, Creator, Agency accounts	Yes + account type check
Developer dashboard	<code>/dev/</code>	Developer accounts	Yes + account type check
Admin panel	<code>/admin/</code>	Internal staff only	Yes + admin role

2. Public Marketing Website

These pages are accessible to anyone — logged in or not. They serve as the acquisition and marketing layer.

2.1 Home — [/](#)

Purpose: Convert visitors into signups.

Primary CTA: "Start Building Your Brand" → </auth/get-started>

Secondary CTA: "Explore Straep" → </discover> (public, limited view)

Page sections (in order):

1. Hero section: headline, subheadline, primary CTA, secondary CTA, hero visual.
 2. Problem statement: "Most platforms make every business page look identical..."
 3. Solution: Straep as the brand-first social business platform.
 4. Feature grid: 8 core features in a card grid.
 5. Brand page builder preview: interactive or animated screenshot.
 6. Social engagement section: follow, save, communities, inquiries.
 7. Storefront and lead generation section: products, inquiry CTAs.
 8. Template marketplace teaser: "Built by developers, used by brands."
 9. User type cards: Businesses, Creators, Customers, Developers, Agencies.
 10. Pricing preview: 3-column simplified pricing table.
 11. Trust section: "Verified brands, real reviews, measurable results."
 12. Final CTA: "Turn your brand into an experience." + "Get Started" button.
-

2.2 About — </about>

Purpose: Build credibility. Explain the company story and mission.

Sections:

- Mission statement
 - The problem we solve
 - How Straep is different
 - The team (placeholder for launch)
 - Values
 - Press/media links (later)
-

2.3 Features — </features>

Purpose: Detailed feature overview for users evaluating the platform.

Sections:

- Feature categories: Brand Pages, Social Feed, Discovery, Storefront, Leads, Analytics, Communities, Templates.
- For each feature: title, description, screenshot, who it's for.

- CTA at bottom: "See pricing" → </pricing>
-

2.4 For Businesses — </for-businesses>

Purpose: Dedicated acquisition page for business owners.

Sections:

- Hero: "The last business page you'll ever need."
 - What a Straep brand page does (vs Facebook, Instagram, LinkedIn).
 - Key features for businesses: storefront, inquiry, analytics, trust.
 - Success story placeholder.
 - Pricing relevant to businesses.
 - CTA: "Create Your Business Page" → </auth/get-started?type=business>
-

2.5 For Creators — </for-creators>

Purpose: Dedicated acquisition page for individual creators and professionals.

Sections:

- Hero: "Your personal brand, fully yours."
 - Showcase portfolio, services, and audience in one place.
 - Features for creators: booking, portfolio, content, audience.
 - CTA: "Build Your Creator Page" → </auth/get-started?type=creator>
-

2.6 For Developers — </for-developers>

Purpose: Recruitment page for template creators joining the marketplace.

Sections:

- Hero: "Build templates. Earn revenue."
 - How the marketplace works.
 - Revenue share explained (70/30).
 - Template categories wanted.
 - Developer tools and documentation.
 - CTA: "Join as a Developer" → </auth/get-started?type=developer>
-

2.7 Template Marketplace (Public Preview) — </marketplace>

Purpose: Showcase available templates before signup. Drive signups.

Sections:

- Search bar.

- Category filter tabs.
 - Template grid (only approved free templates visible without login; paid templates show blurred).
 - "Sign up to install templates" prompt on paid templates.
 - Template detail: accessible without login as preview only.
-

2.8 Pricing — `/pricing`

Purpose: Explain subscription plans and convert to signup.

Sections:

- Monthly / Yearly billing toggle.
 - 5-column plan comparison table: Free, Professional, Business, Agency, Developer.
 - FAQ section.
 - CTA per plan: "Get started free," "Upgrade to Professional," etc.
-

2.9 Blog / Resources — `/blog`

Purpose: SEO content, thought leadership, brand guides.

Sub-routes:

- `/blog` — Blog listing
 - `/blog/:slug` — Individual article
-

2.10 Contact — `/contact`

Purpose: Support and partnership inquiries.

Sections:

- Contact form (name, email, subject, message).
 - Support email.
 - Social links.
 - Response time note.
-

3. Authentication Routes

All under `/auth/`. These pages are accessible to unauthenticated users only; logged-in users are redirected to their appropriate dashboard or feed.

Route	Purpose
<code>/auth/get-started</code>	Signup entry point. First step of onboarding.
<code>/auth/login</code>	Login with email/password or social auth.
<code>/auth/forgot-password</code>	Enter email to receive password reset link.
<code>/auth/reset-password</code>	Enter new password (accessed via reset link).
<code>/auth/verify-email</code>	Enter OTP sent to email after registration.
<code>/auth/verify-phone</code>	Enter OTP sent via SMS (if phone signup).
<code>/auth/onboarding/account-type</code>	Step 1: Select account type.
<code>/auth/onboarding/personal-setup</code>	Step 2a: Personal user profile setup.
<code>/auth/onboarding/business-setup</code>	Step 2b: Business profile setup.
<code>/auth/onboarding/creator-setup</code>	Step 2c: Creator profile setup.
<code>/auth/onboarding/interests</code>	Step 3: Select interests or business category.
<code>/auth/onboarding/follow-suggestions</code>	Step 4: Suggested brands/accounts to follow.
<code>/auth/onboarding/complete</code>	Step 5: Completion screen with next steps.

Onboarding query parameter: `?type=business|creator|developer|agency` pre-selects account type when coming from a marketing page CTA.

4. Logged-In App (All Users)

All registered users share the following core app routes, regardless of account type.

4.1 Home Feed — `/home`

Purpose: Main social feed. First screen personal users see after login.

Content:

- Posts from followed brands and creators.
- Recommended posts based on interests.
- Promoted posts (clearly labelled, Phase 3).
- Stories (Phase 5).

4.2 Discover — `/discover`

Purpose: Find brands, products, services, creators, opportunities.

Sub-routes:

- `/discover` — Discover home (category tiles, featured, trending).
 - `/discover/search` — Search results (brands, products, services, opportunities).
 - `/discover/category/:slug` — Browse a specific category.
 - `/discover/location/:city` — Browse brands in a specific city.
-

4.3 Market — `/market`

Purpose: Browse products and services from all brands on Straep.

Sub-routes:

- `/market` — Market home (featured products, trending services).
 - `/market/products` — All products grid.
 - `/market/services` — All services grid.
 - `/market/product/:id` — Product detail page.
 - `/market/service/:id` — Service detail page.
-

4.4 Communities — `/communities`

Purpose: Discover and join communities. (Phase 3)

Sub-routes:

- `/communities` — Communities discovery.
 - `/communities/:slug` — Individual community feed.
 - `/communities/create` — Create a community (Business+ only).
-

4.5 Create — `/create`

Purpose: Create a post. Accessible from the navigation bar.

Sub-routes:

- `/create` — Post type selection screen.
 - `/create/text` — Text post.
 - `/create/image` — Image post.
 - `/create/product-update` — Product update post.
 - `/create/offer` — Offer post.
 - `/create/event` — Event post.
 - `/create/poll` — Poll post.
 - `/create/opportunity` — Opportunity post (Business plan only).
-

4.6 Messages — `/messages`

Purpose: In-app messaging between users and brands. (Phase 3; Phase 1 uses inquiry system only)

Sub-routes:

- `/messages` — Inbox list.
 - `/messages/:conversationId` — Open conversation.
-

4.7 Notifications — `/notifications`

Purpose: All notifications: new followers, likes, comments, inquiry replies, lead status changes.

4.8 Public Profile / Brand Page — `/p/:username`

Purpose: The public-facing brand page. Visible to all users (including unauthenticated).

Sub-routes:

- `/p/:username` — Brand page overview (default: About + Products).
 - `/p/:username/products` — Storefront products tab.
 - `/p/:username/services` — Services tab.
 - `/p/:username/posts` — Posts tab.
 - `/p/:username/reviews` — Reviews tab (Phase 3).
 - `/p/:username/community` — Community tab (Phase 3).
-

4.9 Saved Items — `/saved`

Purpose: User's saved products, services, and posts.

Sub-routes:

- `/saved` — Default (all saved items).
 - `/saved/products` — Saved products.
 - `/saved/posts` — Saved posts.
-

4.10 Settings — `/settings`

Purpose: Account settings.

Sub-routes:

- `/settings` — Overview / general settings.
- `/settings/profile` — Edit personal profile.
- `/settings/account` — Email, phone, password, connected accounts.

- </settings/notifications> — Notification preferences.
 - </settings/privacy> — Privacy settings.
 - </settings/billing> — Subscription and billing (redirects to dashboard for business accounts).
-

5. Business Dashboard

Accessible only to Business, Creator, and Agency account holders. Business users land here after login (not on </home>).

5.1 Dashboard Overview — </dashboard>

Purpose: Command centre for brand management. Shows key metrics and quick actions.

Metrics displayed:

- Profile views (last 7 days, with % change).
- New followers (last 7 days).
- Post engagement rate (last 7 days).
- Total product/service views (last 7 days).
- Inquiry count (this week vs last week).
- Conversion rate (converted leads / total leads).
- Saved products count.

Quick actions:

- Edit brand page.
 - Add product.
 - Create post.
 - View leads.
-

5.2 Brand Page — </dashboard/brand-page>

Purpose: View and manage the brand page.

Sub-routes:

- </dashboard/brand-page> — Preview of the published brand page + quick stats.
 - </dashboard/brand-page/editor> — The brand page builder editor.
 - </dashboard/brand-page/editor/sections> — Manage and reorder sections.
 - </dashboard/brand-page/editor/design> — Colour, font, button style settings (Professional+).
 - </dashboard/brand-page/editor/template> — Switch template.
 - </dashboard/brand-page/preview> — Full-screen preview (desktop/mobile toggle).
-

5.3 Storefront — `/dashboard/storefront`

Purpose: Manage the digital storefront.

Sub-routes:

- `/dashboard/storefront` — Storefront overview (product and service counts, total views).
 - `/dashboard/storefront/products` — Product list.
 - `/dashboard/storefront/products/add` — Add new product.
 - `/dashboard/storefront/products/:id/edit` — Edit product.
 - `/dashboard/storefront/services` — Service list.
 - `/dashboard/storefront/services/add` — Add new service.
 - `/dashboard/storefront/services/:id/edit` — Edit service.
-

5.4 Posts — `/dashboard/posts`

Purpose: Manage all posts published by the brand.

Sub-routes:

- `/dashboard/posts` — Posts list (published, draft, scheduled).
 - `/dashboard/posts/:id` — Post detail with engagement metrics.
-

5.5 Leads / Inquiries — `/dashboard/leads`

Purpose: CRM-style inbox for managing customer inquiries.

Sub-routes:

- `/dashboard/leads` — Leads inbox (list view with status filters).
 - `/dashboard/leads/:id` — Lead detail page (message, reply, status, notes).
-

5.6 Analytics — `/dashboard/analytics`

Purpose: Detailed performance analytics. (Basic on Free; full on Professional+)

Sub-routes:

- `/dashboard/analytics` — Overview charts (views, followers, engagement over time).
 - `/dashboard/analytics/posts` — Post-level performance.
 - `/dashboard/analytics/products` — Product/service view performance.
 - `/dashboard/analytics/leads` — Inquiry and conversion metrics.
 - `/dashboard/analytics/audience` — Follower demographics (Phase 3).
-

5.7 Templates — </dashboard/templates>

Purpose: View, manage, and apply templates.

Sub-routes:

- </dashboard/templates> — My templates (installed / purchased).
 - </dashboard/templates/marketplace> — Browse and buy templates.
 - </dashboard/templates/marketplace/:id> — Template detail with preview.
-

5.8 Subscription — </dashboard/subscription>

Purpose: Manage subscription plan and billing.

Sub-routes:

- </dashboard/subscription> — Current plan overview.
 - </dashboard/subscription/upgrade> — Upgrade plan selection.
 - </dashboard/subscription/billing> — Payment history.
 - </dashboard/subscription/cancel> — Cancel flow.
-

5.9 Settings — </dashboard/settings>

Purpose: Business-specific settings.

Sub-routes:

- </dashboard/settings> — General settings.
 - </dashboard/settings/team> — Team members (Business plan+).
 - </dashboard/settings/integrations> — Third-party integrations (Phase 3).
 - </dashboard/settings/notifications> — Business notification preferences.
-

6. Developer Dashboard

Accessible only to Developer account holders.

Route	Purpose
<code>/dev</code>	Developer overview (sales summary, recent sales, pending reviews)
<code>/dev/templates</code>	My templates list (approved, pending, rejected)
<code>/dev/templates/:id</code>	Template detail with sales data
<code>/dev/upload</code>	Upload new template (multi-step form)
<code>/dev/sales</code>	Sales analytics dashboard
<code>/dev/sales/:templateId</code>	Per-template sales breakdown
<code>/dev/reviews</code>	All reviews received on templates
<code>/dev/payouts</code>	Payout balance, bank details, withdrawal history
<code>/dev/payouts/request</code>	Request a payout
<code>/dev/docs</code>	Developer documentation and guidelines
<code>/dev/settings</code>	Developer account settings

7. Admin Dashboard

Internal-only. Accessible only to users with the `admin` or `superadmin` role.

Route	Purpose
/admin	Admin overview: pending tasks, platform health metrics
/admin/users	User list with search, filter, and bulk actions
/admin/users/:id	User detail: profile, account history, flags, actions
/admin/brands	Brand page list with status filters
/admin/brands/:id	Brand detail: page preview, status, verification, actions
/admin/posts	Reported posts queue
/admin/posts/:id	Post review with approve/remove action
/admin/templates	Template approval queue
/admin/templates/:id	Template review: preview, screenshots, approve/reject with notes
/admin/subscriptions	All subscription records
/admin/payments	Payment logs across all users
/admin/payments/:id	Payment detail: provider reference, status, dispute action
/admin/reports	Reports and abuse queue (posts, brands, users)
/admin/reports/:id	Individual report review
/admin/verification	Business verification requests
/admin/verification/:id	Review submitted documents, approve/reject badge
/admin/categories	Manage platform categories and tags
/admin/analytics	Platform-level analytics: DAU, MAU, revenue, signup sources
/admin/settings	Admin panel settings and role management
/admin/audit-log	Full audit log of all admin actions

8. Navigation Structures

8.1 Public Website Navigation (Header)

Logo (Straep)	Features	For Businesses	For Creators	Marketplace
Pricing	Blog	Sign In	Get Started [CTA]	

Mobile (collapsed): Hamburger menu with all links stacked vertically.

8.2 App Navigation — Personal Users (Mobile Bottom Bar)

[Home] [Discover] [+Create] [Market] [Profile]

Mobile header: Logo + Notifications bell + Messages icon.

8.3 App Navigation — Business Users (Mobile Bottom Bar)

[Dashboard] [Feed] [+Create] [Discover] [Profile]

Mobile header: Logo + Notifications bell + Leads shortcut.

8.4 Business Dashboard Left Sidebar (Desktop)

Straep Logo

[Overview]

10. Route Definitions Reference

This table gives engineers the information needed to define routes in both the frontend (Next.js `app/` directory) and backend (Django `urls.py`).

Route	Auth Required	Account Types Allowed	Notes
/	No	All	Public home
/about	No	All	Public
/features	No	All	Public
/for-businesses	No	All	Public
/for-creators	No	All	Public
/for-developers	No	All	Public
/marketplace	No	All	Public preview; login needed to install
/pricing	No	All	Public
/blog	No	All	Public
/contact	No	All	Public
/auth/*	No	Unauthenticated only	Redirect logged-in users to their home
/home	Yes	All	Personalised feed
/discover	No (limited)	All	Unauthenticated gets reduced view
/market	No (limited)	All	
/communities	Yes	All	Phase 3
/create	Yes	All	
/messages	Yes	All	Phase 3
/notifications	Yes	All	
/p/:username	No	All	Public brand page
/saved	Yes	All	
/settings	Yes	All	
/dashboard/*	Yes	Business, Creator, Agency	403 if wrong type
/dev/*	Yes	Developer	403 if wrong type

Route	Auth Required	Account Types Allowed	Notes
<code>/admin/*</code>	Yes	Admin role only	403 if no admin role

11. Redirect and Guard Rules

11.1 Unauthenticated User Redirect

If a user who is not logged in tries to access a protected route:

→ Redirect to `/auth/login?redirect=<original_route>`

After successful login, redirect them back to the original route.

11.2 Wrong Account Type Redirect

If a business user tries to access `/dev/*`:

→ Show a 403 page with explanation: "This section is only available for Developer accounts."
→ CTA: "Go to your dashboard" → `/dashboard`

11.3 Logged-In User Accessing Auth Pages

If a logged-in user visits `/auth/login` or `/auth/get-started`:

Business/Creator/Agency → `/dashboard`
Personal → `/home`
Developer → `/dev`
Admin → `/admin`

11.4 Incomplete Onboarding Redirect

If a user is registered but has not completed onboarding (account type not selected):

→ Redirect to `/auth/onboarding/account-type` on any protected route visit

11.5 Free Plan Feature Gate

When a Free plan user visits a Professional-only route (e.g., `/dashboard/analytics`):

→ Show the page with a locked overlay
→ Display upgrade modal with specific feature benefit
→ Do NOT redirect (user should see what they're missing)

11.6 Admin Access

Admin users can also use the regular app. Admin role adds the `/admin/*` routes on top of their personal access. Admin does not restrict access to the standard app.

11.7 Subdomain Consideration (Future)

In Phase 3 or later, brand pages could optionally be served at `brandname.straep.com` (subdomain routing). This must be planned in the DNS and Next.js configuration from the start, even if not activated immediately. The `/p/:username` route should use the same component as the subdomain route.
