1. Feature Priority Framework

All features are labelled with a priority:

Label	Meaning
P0	Must ship in MVP (Phase 1). Platform does not work without this.
P1	Should ship in Phase 2. Significant impact on monetisation or retention.
P2	Phase 3. Important for engagement and trust.
P3	Phase 4-5. Marketplace and scale features.

2. Authentication and Onboarding

Priority: P0

2.1 Registration

ID	Requirement	Notes
AUTH-01	User can register with email and password	Password min 8 chars, 1 uppercase, 1 number
AUTH-02	User can register with phone number and OTP	OTP expires in 10 minutes
AUTH-03	User can register with Google OAuth	Use Google Sign-In button
AUTH-04	User can register with Apple Sign-In	Required for iOS app (Phase 5)
AUTH-05	Email/phone verification is required before account is active	Unverified accounts cannot access protected routes
AUTH-06	Verification OTP is 6 digits, numeric only	Expires in 10 minutes; resend available after 60 seconds
AUTH-07	Maximum 3 failed OTP attempts before 15-minute lockout	Anti-brute-force

2.2 Login

ID	Requirement	Notes
AUTH-08	Login with email/password	
AUTH-09	Login with Google	
AUTH-10	Login with phone number + OTP	
AUTH-11	"Remember me" keeps session for 30 days	Default: session token expires on browser close
AUTH-12	5 failed login attempts triggers a 15-minute account lockout	Security
AUTH-13	Lockout notification sent to registered email	

2.3 Password Recovery

ID	Requirement	Notes
AUTH-14	Forgot password sends a reset link to the registered email	Link expires in 30 minutes
AUTH-15	Reset link is single-use (invalidated after use or expiry)	
AUTH-16	New password must not be the same as the previous password	

2.4 Onboarding Flow

ID	Requirement	Notes
OB-01	After verification, user is taken to account type selection screen	Cannot skip
OB-02	Account type selection shows 5 cards: Personal, Business, Creator, Developer, Agency	Cards include icon, name, description, 3 bullet points
OB-03	Selecting an account type leads to the appropriate setup flow	
OB-04	Personal setup: display name, username, profile photo, short bio	Username must be unique; suggestions offered if taken
OB-05	Business setup: business name, category, industry, location, short description, logo, cover image	Logo upload optional at this step
OB-06	Creator setup: display name, professional title, category, short bio	
OB-07	Interests/category selection: user picks 3-8 interest tags	Drives initial feed and discovery
OB-08	Follow suggestions: shows 8-12 relevant brands/creators	Based on selected interests
OB-09	Completion screen: shows what the user can do next	Different CTAs per account type
OB-10	Query parameter <code>?type=business</code> pre-selects account type when coming from marketing CTA	
OB-11	Incomplete onboarding state is stored; user is returned to their last onboarding step on re-login	

2.5 Session Management

ID	Requirement	Notes
AUTH-17	Access token: JWT, expires in 15 minutes	
AUTH-18	Refresh token: stored in HTTP-only cookie, expires in 30 days	Never exposed to JavaScript
AUTH-19	All API requests use the access token in the Authorization header	<code>Authorization: Bearer <token></code>
AUTH-20	Refresh token automatically renews the access token on 401 responses	Client handles token refresh silently
AUTH-21	Explicit logout invalidates the refresh token in the database	

3. Brand Page Builder

Priority: P0

3.1 Page Editor Layout

ID	Requirement	Notes
BPB-01	Editor layout: left sidebar (section list), centre (live preview), right panel (section settings)	
BPB-02	Top bar: Preview toggle (desktop/mobile), Save Draft, Publish, Back to Dashboard	
BPB-03	Autosave triggers every 30 seconds if there are unsaved changes	Saves as draft, does not publish
BPB-04	User can manually click "Save Draft" at any time	
BPB-05	"Publish" makes the page publicly visible at <code>/p/:username</code>	Asks for confirmation before first publish
BPB-06	Desktop preview shows the page at 1200px width	
BPB-07	Mobile preview shows the page at 375px width	
BPB-08	Left sidebar shows all current page sections in order	

ID	Requirement	Notes
BPB-09	Sections can be reordered via drag-and-drop in the left sidebar	
BPB-10	Clicking a section in the sidebar highlights it in the preview and opens its settings in the right panel	
BPB-11	Sections can be toggled visible/hidden without deleting them	Hidden sections do not appear on the public page
BPB-12	Sections can be deleted with a confirmation prompt	

3.2 Page Sections Available

Section	Free Plan	Professional+	Notes
Header (logo, cover, name, tagline)	✓	✓	Required; cannot be removed
About / Brand Story	✓	✓	Text area
Products	✓ (up to 5)	✓ (up to 20)	
Services	✓ (up to 3)	✓ (up to 10)	
Contact	✓	✓	Shows email, phone, WhatsApp, social links
Social Links	✓	✓	
Custom CTA Button	—	✓	Custom label and link
Testimonials	—	✓	Phase 3 (data), but section visible in Phase 1 as manual text
Portfolio / Gallery	—	✓	Image grid
Team Members	—	✓ (Business plan)	
FAQ	—	✓	
Video Embed	—	✓	YouTube/Vimeo URL
Custom HTML Block	—	✓ (Business plan)	
Opportunity Board	—	✓ (Business plan)	Shows open opportunities

3.3 Design Customisation

ID	Requirement	Plan
BPB-13	Template selection from within the editor	Free: 3 options; Professional: all
BPB-14	Primary brand colour picker (hex input + colour wheel)	Professional+
BPB-15	Secondary brand colour picker	Professional+
BPB-16	Button style selection (solid, outline, rounded, square)	Professional+
BPB-17	Heading font selection from a curated list of 10 options	Professional+
BPB-18	Body font selection from a curated list of 10 options	Professional+
BPB-19	Header layout options (logo left, logo centre, logo with tagline)	Professional+
BPB-20	Cover image upload (recommended: 1600x400px)	Free+
BPB-21	Logo upload (recommended: PNG, 400x400px)	Free+
BPB-22	Remove Straep footer branding	Professional+
BPB-23	"Powered by Straep" watermark visible on Free pages	Small, in footer

3.4 Upgrade Prompts Within the Editor

ID	Requirement
BPB-24	Locked sections show a greyed-out preview with a lock icon overlay
BPB-25	Clicking a locked section opens an upgrade modal specific to that feature
BPB-26	Upgrade modal includes: what the feature does, which plan it's in, and an "Upgrade Now" CTA
BPB-27	After upgrade, user is returned to the exact section they clicked

4. Brand Page Public View

Priority: P0

4.1 Page Layout and Sections

ID	Requirement	Notes
BPV-01	Header: cover image, logo, brand name, verified badge (if applicable), category, location	
BPV-02	Action bar: Follow button, Message button, Send Inquiry button	Sticky on scroll (mobile)
BPV-03	Follow button shows follower count	Updates without page reload
BPV-04	Tabs below header: About, Products, Services, Posts, Reviews	Only visible tabs for sections with content
BPV-05	About tab: brand description, business hours (optional), social links, contact info	
BPV-06	Products tab: grid of product cards (image, name, price, inquiry button)	
BPV-07	Services tab: list of service cards (name, starting price, duration, inquiry button)	
BPV-08	Posts tab: chronological feed of brand's posts	
BPV-09	Reviews tab: star rating summary, individual reviews (Phase 3)	
BPV-10	Portfolio/gallery section visible in About tab or its own tab (if configured)	

4.2 CTAs and Actions

ID	Requirement	Notes
BPV-11	"Follow" — follows the brand; shows unfollow on second click	
BPV-12	"Send Inquiry" — opens inquiry modal	Available to guests and logged-in users
BPV-13	"Request Quote" — opens inquiry modal (alternative label, same functionality)	
BPV-14	"Message" — opens Straep messaging (Phase 3); Phase 1: redirects to inquiry	Requires login

ID	Requirement	Notes
BPV-15	"Save" on product cards — saves product to the user's saved items	Requires login
BPV-16	"Visit Storefront" — scrolls to or links to the Products/Services tab	
BPV-17	Custom CTA button (Professional+) — brand-defined label and destination	

4.3 SEO and Shareability

ID	Requirement	Notes
BPV-18	Brand page URL: <code>straep.com/p/:username</code>	Clean, shareable URL
BPV-19	Open Graph meta tags for social sharing (title, description, image = logo or cover)	
BPV-20	Page title: <code>[Brand Name] on Straep</code>	
BPV-21	Brand page is crawlable by search engines	No <code>noindex</code> for published pages

5. Digital Storefront

Priority: P0

5.1 Product Management

ID	Requirement	Plan Limit
STORE-01	Brand can add a product with: name, description, price, currency, category, images (up to 5), availability, delivery note	All plans
STORE-02	Maximum products: 5 (Free), 20 (Professional), unlimited (Business, Agency)	
STORE-03	Product images: minimum 1, maximum 5, auto-compressed to under 2MB each	
STORE-04	Availability toggle: In Stock / Out of Stock	Visible on product card
STORE-05	Inquiry button on each product links to inquiry modal pre-filled with product name	

ID	Requirement	Plan Limit
STORE-06	Products displayed in storefront as a grid (2 cols mobile, 3 cols desktop)	
STORE-07	Product can be featured (appears first in grid)	1 featured product on Free; unlimited on Professional+
STORE-08	Products can be archived (not deleted, just hidden from storefront)	
STORE-09	Product detail page: full description, all images (carousel), price, availability, delivery note, inquiry button	

5.2 Service Management

ID	Requirement	Plan Limit
STORE-10	Brand can add a service with: name, description, starting price, currency, duration, consultation option, portfolio proof, CTA type (inquiry/booking)	All plans
STORE-11	Maximum services: 3 (Free), 10 (Professional), unlimited (Business, Agency)	
STORE-12	Services displayed as a list/card view (not a grid)	
STORE-13	"Book a Consultation" and "Send Inquiry" are separate CTA options per service	
STORE-14	Portfolio proof: upload an image or enter a URL as evidence of past work	

5.3 Storefront Dashboard

ID	Requirement
STORE-15	<code>/dashboard/storefront</code> shows: total product views (7 days), top viewed product, total service views, product count vs plan limit
STORE-16	Product list in dashboard shows: thumbnail, name, price, views, availability, edit/archive/delete actions
STORE-17	Hitting the product limit shows an inline banner: "You've reached your product limit. Upgrade to add more." with upgrade CTA

6. Inquiry and Lead Management

6.1 Inquiry Submission (Customer Side)

ID	Requirement	Notes
INQ-01	Inquiry modal fields: Full name, Message (required), Product/service of interest (pre-filled if from product), Preferred contact (Straep message / WhatsApp / Email)	
INQ-02	Guest users can submit inquiries (name + message only; no login required)	
INQ-03	Logged-in users' name and contact are pre-filled from their profile	
INQ-04	CAPTCHA on inquiry form to prevent spam (Cloudflare Turnstile or Google reCAPTCHA v3)	
INQ-05	Rate limiting: max 3 inquiries per IP address per brand per 24 hours	Anti-spam
INQ-06	Confirmation screen: "Inquiry sent! [Brand Name] typically responds within X hours."	Response time calculated from brand's history
INQ-07	Confirmation screen offers: "Follow [Brand Name]" and "Explore more brands" CTAs	

6.2 Lead Inbox (Business Side)

ID	Requirement	Notes
INQ-08	<code>/dashboard/leads</code> shows all inquiries sorted by date (newest first)	
INQ-09	Each row: avatar/initials, sender name, product/service interest, date, status badge, message preview (first 80 chars)	
INQ-10	Status badge colours: New (blue), Contacted (purple), In Discussion (amber), Converted (green), Closed (grey), Rejected (red)	
INQ-11	Filter by status tabs across the top of the inbox	
INQ-12	Search bar: search inquiries by sender name or keyword	
INQ-13	Unread leads count shown as a badge on "Leads" in the dashboard navigation	

ID	Requirement	Notes
INQ-14	Email notification sent to brand owner for each new inquiry (within 60 seconds)	
INQ-15	In-app notification for each new inquiry	
INQ-16	Free plan: up to 10 active leads. Above 10, new inquiries are received but not visible until plan upgrade.	Show "You have X hidden leads — upgrade to see them"

6.3 Lead Detail View

ID	Requirement	Notes
INQ-17	Lead detail: full message, sender info, product/service of interest, contact preference, date/time	
INQ-18	Status selector: dropdown to change lead status	
INQ-19	Private notes field: brand can add internal notes per lead	Notes are never visible to the customer
INQ-20	"Reply" action opens Straep messaging thread with the customer (Phase 3); Phase 1: shows contact preference (WhatsApp link, email link)	
INQ-21	"Mark as Converted" action updates conversion metrics in the analytics dashboard	

7. Social Feed

Priority: P0

7.1 Feed Composition

ID	Requirement	Notes
FEED-01	Authenticated users see a personalised feed on <code>/home</code>	
FEED-02	Feed consists of: posts from followed brands (50%), recommended posts (40%), opportunity posts (10%)	Weights adjustable via config
FEED-03	New users with no follows see a recommended feed based on selected interests	

ID	Requirement	Notes
FEED-04	Feed uses cursor-based pagination (not offset); loads next page when user reaches 80% of current content	
FEED-05	Feed does not repeat the same post within 24 hours for the same user	
FEED-06	Promoted posts appear at most once per 10 organic posts and are clearly labelled "Sponsored"	Phase 3

7.2 Post Card Design and Actions

ID	Requirement	Notes
FEED-07	Post card: author avatar, author name, verified badge (if applicable), timestamp, post content, media, engagement bar	
FEED-08	Engagement bar: Like (count), Comment (count), Share, Save, More (...) menu	
FEED-09	Like: toggles on/off, count updates immediately (optimistic UI)	
FEED-10	Comment: opens comment thread below the post	
FEED-11	Share: opens a share sheet (copy link, share to social)	
FEED-12	Save: saves post to user's Saved Items; toggles on/off	
FEED-13	More (...) menu: "Visit Brand Page," "Follow/Unfollow," "Report post"	
FEED-14	Clicking the author name/avatar opens the brand page	
FEED-15	Reported posts go to the admin moderation queue immediately	

7.3 Feed Performance

ID	Requirement	Notes
FEED-16	Feed API must respond in under 500ms at p95	Use Redis cache
FEED-17	For brands with under 10,000 followers: fan-out on write (push post to follower feed caches)	

ID	Requirement	Notes
FEED-18	For brands with over 10,000 followers: fan-out on read (pull from brand's post list at request time)	Prevents Redis queue overload

8. Discover and Search

Priority: P0

8.1 Discover Page

ID	Requirement	Notes
DISC-01	Discover home shows: search bar, category chips, Featured brands (editorial), Trending brands, Verified brands, New on Straep, Recommended for you	
DISC-02	Category chips are horizontally scrollable on mobile	
DISC-03	Location detection: user is prompted (once) to share location; detected location used to surface local brands	
DISC-04	User can manually set their location in the filter panel	

8.2 Search

ID	Requirement	Notes
DISC-05	Search bar searches across: brand names, product names, service names, categories	
DISC-06	Search is triggered on typing (debounced 300ms); results update in real time	
DISC-07	Search results divided into tabs: Brands, Products, Services	
DISC-08	No results state: "No results for '[query]'. Try adjusting your filters."	

8.3 Filter Panel

ID	Filter	Type
DISC-09	Industry	Multi-select dropdown
DISC-10	Location / City	Text input with suggestions
DISC-11	Category	Multi-select chips

ID	Filter	Type
DISC-12	Minimum rating	Star selector (1-5) — Phase 3
DISC-13	Verified only	Toggle
DISC-14	Has offers	Toggle
DISC-15	Price range	Range slider (for products/services)
DISC-16	Popularity	Sort option: Most followed, Most viewed, Newest

8.4 Brand Card

ID	Requirement
DISC-17	Brand card: logo, brand name, verified badge, category, location, short description, follower count, follow button
DISC-18	Clicking the brand card opens the public brand page
DISC-19	Follow button on the brand card works without navigating to the brand page

9. Post Creation

Priority: P0

9.1 Post Type Selection

ID	Requirement	Notes
POST-01	Create button (+) in navigation opens post type selection screen	
POST-02	Post types: Text, Image, Product Update, Offer, Event, Poll, Opportunity, Video (Phase 2)	
POST-03	Each post type has a distinct icon and one-line description	
POST-04	Post type selection is a full-screen modal on mobile	

9.2 Per Post Type Requirements

Text post:

- Rich text area: bold, italic, hyperlink.
- Character limit: 1,500.

- Preview shows formatted output.

Image post:

- Upload 1-8 images.
- Caption (optional, 500 chars max).
- Images displayed as carousel if more than 1.
- Images auto-compressed to under 2MB on upload.

Product update:

- Attach one product from the brand's storefront.
- Auto-fills product name, image, and price.
- Add a caption about the update.

Offer:

- Headline (80 chars max).
- Description (500 chars max).
- Discount amount or code.
- Expiry date/time.
- Offer shows a countdown timer on the post card.

Event:

- Event title.
- Description.
- Date and time (start, end).
- Location (physical address or online link).
- Registration link (optional).

Poll:

- Question (120 chars max).
- 2-4 options (40 chars each).
- Duration: 1 day, 3 days, 7 days.
- Results visible to all after voting; breakdown shows percentage per option.

Opportunity:

- Type: Job, Internship, Collaboration, Partnership, Volunteer, Event, Training.
- Title.
- Description.
- Requirements.
- Deadline.
- Apply link or "Apply on Straep" button.
- Opportunity plan gate: Business plan and above only.

9.3 Post Publish Flow

ID	Requirement	Notes
POST-05	All post types have a Preview step before publishing	
POST-06	On publish, post appears on the brand page Posts tab immediately	
POST-07	On publish, post is pushed to followers' feeds within 60 seconds	Via Celery task
POST-08	Brand can delete their own post at any time	Removes from feed and brand page
POST-09	Brand can edit a published post within 24 hours (with an "edited" label)	After 24 hours, editing is disabled

10. Business Dashboard

Priority: P0

10.1 Overview Metrics

Metric	Description	Plan
Profile views	Total views of the brand page in the last 7 days, with % change vs previous 7 days	All
New followers	Followers gained in the last 7 days	All
Post engagement rate	(Likes + Comments + Saves) / Post impressions × 100, averaged over last 7 days	All
Product/service views	Total views across all storefront items in last 7 days	All
Inquiry count	New inquiries in the last 7 days	All
Conversion rate	(Converted leads / Total leads) × 100, all time	Professional+
Saved products	Total times brand's products have been saved by users	All

10.2 Quick Actions

Action	Destination
Edit Brand Page	<code>/dashboard/brand-page/editor</code>
Add Product	<code>/dashboard/storefront/products/add</code>

Action	Destination
Create Post	<code>/create</code>
View Leads	<code>/dashboard/leads</code>

10.3 Dashboard Sections

Each section in the sidebar is a separate page/view within the dashboard. See the Sitemap document for full sub-route structure.

11. Subscription and Plan Gating

Priority: P0

11.1 Plan Gate Mechanics

ID	Requirement	Notes
PLAN-01	Every protected feature has a <code>plan_required</code> attribute defined in the backend	e.g., <code>plan_required: "professional"</code>
PLAN-02	The backend attaches the user's current plan to every authenticated request via middleware	
PLAN-03	Frontend reads plan from the <code>/auth/me</code> endpoint response and stores in global state	
PLAN-04	Locked features are visible but overlaid with a lock icon; they are never hidden entirely	"Ghost" UI approach: show the value, then restrict access
PLAN-05	Clicking a locked feature triggers the upgrade modal	
PLAN-06	Upgrade modal: feature name, benefit description, plan required, "Upgrade Now" CTA, "See all plans" secondary link	
PLAN-07	After successful payment, the frontend refetches <code>/auth/me</code> to update plan state	
PLAN-08	User is redirected back to the feature they were trying to access after upgrade	Use <code>returnTo</code> param in upgrade flow

11.2 Pricing Page

ID	Requirement
PLAN-09	<code>/pricing</code> shows all 5 plans in a comparison table
PLAN-10	Monthly/yearly billing toggle; yearly shows "Save 20%" badge

ID	Requirement
PLAN-11	Each plan column: name, price, 8-12 feature rows with ✓ / — / plan label
PLAN-12	"Most popular" badge on Professional plan
PLAN-13	FAQ section at the bottom
PLAN-14	Each plan has a CTA: "Get started free," "Upgrade to Professional," etc.

11.3 Checkout Flow

ID	Requirement	Notes
PLAN-15	Checkout initiated via POST to <code>/subscriptions/checkout</code>	Returns a Paystack payment URL
PLAN-16	User is redirected to Paystack/Stripe for payment	Never handle card data directly
PLAN-17	On payment success, Paystack sends a webhook to <code>/subscriptions/webhook</code>	
PLAN-18	Webhook handler: verify signature, update Subscription record, unlock plan features	
PLAN-19	Success screen: "You're on [Plan Name]!" with list of newly unlocked features	
PLAN-20	Failure screen: "Payment was not completed. No charge was made." with retry CTA	

12. Notifications

Priority: P1

12.1 Notification Types

Notification	Trigger	Recipient
New follower	User A follows Brand B	Brand B owner
New inquiry	User A sends inquiry to Brand B	Brand B owner
Post like	User A likes Brand B's post	Brand B owner (batched: max 1 per post per hour)
Post comment	User A comments on Brand B's post	Brand B owner

Notification	Trigger	Recipient
Post comment reply	User A replies to User B's comment	User B
Inquiry status change	Brand B changes lead status to "Converted"	User A (the original sender) — Phase 2
New message	User A sends Brand B a message	Brand B (Phase 3)
Template approved	Admin approves Developer's template	Developer
Template rejected	Admin rejects Developer's template	Developer
Subscription renewal	7 days before renewal date	Subscriber
Payment failed	Webhook indicates payment failure	Subscriber

12.2 Notification Delivery

Channel	Phase	Notes
In-app notification centre (/notifications)	P0	All notification types
Email	P0	New inquiry, follower milestone, payment events
Push (web push)	P1	Opt-in; new inquiry, new message
Push (mobile)	P3	React Native app phase

12.3 Notification Preferences

Users can configure per-notification-type preferences in (</settings/notifications>):

- Enable/disable each type.
- Email digest: instant, daily, weekly, or never.

13. Messaging

Priority: P2 (Phase 3)

In Phase 1, inquiry responses are handled via the lead dashboard (showing contact preference: WhatsApp / Email). Full in-app messaging launches in Phase 3.

ID	Requirement
MSG-01	Real-time messaging via WebSockets (Django Channels)
MSG-02	Conversations are between a user and a brand (not user-to-user, except creator to follower)
MSG-03	Message delivery status: sent, delivered, read
MSG-04	Media attachments: images and files up to 10MB
MSG-05	Message thread is linked to the inquiry if the conversation started from an inquiry
MSG-06	Brand can mark conversations as resolved/closed
MSG-07	Message history retained for 12 months (Professional+); 90 days (Free)

14. Communities

Priority: P2 (Phase 3)

ID	Requirement
COM-01	Any user can join a community
COM-02	Business and Creator accounts can create a community (one community on Professional; unlimited on Business)
COM-03	Community types: public (anyone can join) and invite-only
COM-04	Community content types: text post, image post, poll, event, challenge
COM-05	Community moderators can be assigned by the community creator
COM-06	Reported community posts go to the admin moderation queue
COM-07	Community appears on the brand's public page as a tab
COM-08	Community member count and recent activity shown on the community card

15. Reviews and Trust

Priority: P2 (Phase 3)

ID	Requirement
REV-01	Only users who have submitted an inquiry (confirmed via Inquiry record) can leave a review
REV-02	Review fields: star rating (1–5 required), written review (optional, max 500 chars)
REV-03	Brands can respond to reviews (one response per review)
REV-04	Brand's aggregate rating appears on: brand page header, brand card in Discover, search results
REV-05	Fake review prevention: minimum 48-hour wait after inquiry submission before review is allowed
REV-06	Admin can remove reviews that violate policies
REV-07	Verified badge: business submits documents (CAC certificate, business address) via a form; admin reviews and approves
REV-08	Response rate shown on brand page: percentage of inquiries responded to within 24 hours

16. Template Marketplace

Priority: P3 (Phase 4)

16.1 User-Facing

ID	Requirement
TMP-01	Template marketplace home: search bar, category filter, featured templates, new templates, free templates
TMP-02	Template card: preview thumbnail, template name, category, developer name, price, rating, install/buy CTA
TMP-03	Template detail page: full preview (desktop + mobile), feature list, compatible sections, developer info, rating breakdown, price, CTA
TMP-04	Free templates: one-click install

ID	Requirement
TMP-05	Paid templates: standard checkout flow; on payment success, template added to "My Templates"
TMP-06	"My Templates" section in dashboard shows all installed/purchased templates
TMP-07	Applying a template from "My Templates" opens the brand page editor with the template pre-applied

16.2 Template Format Standard

Templates are defined as a JSON package with the following structure:

```
template-package/  
├─ metadata.json      ← Template metadata (name, category, sections,  
version)  
├─ sections/          ← Per-section config files  
├─ assets/             ← Fonts, icons, placeholders  
└─ previews/           ← Preview images (min 3)
```

`metadata.json` must include: `id`, `name`, `version`, `category`, `supported_sections[]`, `color_tokens`, `font_tokens`, `straep_version_min`.

17. Developer Dashboard

Priority: P3 (Phase 4)

ID	Requirement
DEV-01	Developer overview: total earnings, pending payout balance, active templates count, total downloads, average rating
DEV-02	My Templates list: template name, status, downloads, revenue, rating, edit/update action
DEV-03	Template upload form: multi-step (Details → Pricing → Media → Package → Submit)
DEV-04	Template status: Pending Review, Approved, Rejected (with admin reason), Flagged
DEV-05	Sales analytics: revenue over time chart, per-template breakdown, download trends
DEV-06	Payout: balance, bank details (add/edit), withdrawal history, "Request Payout" button
DEV-07	Minimum payout: ₦10,000; payout twice monthly (1st and 15th)
DEV-08	Documentation: in-app guide for template format, submission guidelines, design requirements

18. Admin Panel

Priority: P0 (basic version), P1 (full version)

18.1 Admin Overview

ID	Requirement
ADM-01	Admin overview shows: pending tasks (reported posts, templates awaiting review, verification requests, payment disputes) as badge counts
ADM-02	Platform health metrics: DAU, MAU, new signups today, active subscriptions, MRR
ADM-03	All admin actions are logged to an immutable audit log (admin ID, action, target entity, timestamp, reason note)

18.2 User Management

ID	Requirement
ADM-04	User list with: name, email, account type, signup date, plan, status (active/suspended)

ID	Requirement
ADM-05	Filter by account type, plan, status, signup date range
ADM-06	Search by name or email
ADM-07	User detail: profile info, brand pages, subscriptions, reports, actions
ADM-08	Actions: suspend, unsuspend, force password reset, delete account (soft delete), change account type

18.3 Template Approval

ID	Requirement
ADM-09	Template review queue shows: template name, developer, date submitted, preview thumbnail
ADM-10	Template detail review: full preview (desktop + mobile), metadata, feature list, package validation result
ADM-11	Approve: template goes live in marketplace
ADM-12	Reject: admin must enter a reason; developer receives notification with reason
ADM-13	SLA: templates reviewed within 3-5 business days (tracked on admin overview)

18.4 Post Moderation

ID	Requirement
ADM-14	Reported posts queue: post preview, report reason, reporter, date reported, times reported
ADM-15	Actions: dismiss report, remove post, warn user, suspend user
ADM-16	Removed posts show a "This post was removed for violating Straep's guidelines" placeholder

19. Analytics

Priority: P1 (Basic on Free P0, Full on Professional P1)

19.1 Brand Analytics (Dashboard)

Metric	Free	Professional+
Profile views (7 days)	✓	✓
Profile views over time (30/90 days)	—	✓
Follower count and growth	✓	✓
Follower growth chart	—	✓
Post reach and impressions	—	✓
Per-post engagement breakdown	—	✓
Product/service view count	✓	✓
Per-product view trend	—	✓
Inquiry count	✓	✓
Lead conversion rate	—	✓
Top traffic sources (how people find the brand page)	—	✓
Audience location breakdown	—	✓ (Phase 3)

19.2 Platform Analytics (Admin)

Metric	Description
DAU / MAU	Daily and monthly active users
Signup trend	New registrations per day/week
Active subscriptions	By plan type
MRR	Monthly recurring revenue, by plan
Template sales	Total sales and revenue in the marketplace
Feed engagement	Average posts per user per day
Top categories	Most followed categories
Inquiry volume	Total inquiries sent per day
Conversion rate	Platform-wide: inquiries that lead to status "Converted"
